With almost 8 years of professional experience, I specialize in back-end web development with skills in CMS and frameworks. I'm able to address technical urgencies and contribute to the success of various projects. Invested, conscientious, and collaborative, I am always eager to tackle new technical challenges and bring positive energy to impactful projects.

Relevant Experience

Full-stack Web Developer - **Wazoom** - QC, Canada Oct 2025 — Nov 2025

- Managed the **full lifecycle** development of a WordPress website, from initial architecture to production.
- Executed full-stack development, including the implementation of **custom back-end functionalities** and front-end integration.
- Delivered a **near-final build** optimized for staging environments.

Full-stack Web Developer - **Webilio** - QC, Canada Aug 2025 — Sep 2025

- Contributed to the development of a **Laravel, GraphQL, and Vue.js** application.
- Assisted with other projects through QA and bug fixes.

Back-end Web Developer - **Libéo** - QC, Canada Nov 2019 — Apr 2025

- Provided **technical support** for a diverse range of CMS and frameworks projects such as TYPO3, WordPress, Laravel, Drupal and Next.js.
- Responded to **critical project errors**, expanding technical knowledge and emergency response skills.
- Lead developer** of a major Quebec government website, ensuring high availability and compliance with strict security standards.
- Streamlined deployment operations by implementing GitLab **CI/CD pipelines** for reliable and automated releases.
- Improved system maintainability and knowledge transfer by creating thorough documentation.
- Involvement in numerous **interactions with the clients**.
- Worked across development teams, participating in the **full project lifecycle** from design to release.
- Expanded technical skills by learning Drupal, Vue.js, Docker, and deepening knowledge of WordPress and Laravel.
- Adapted to agile methodologies and evolving development tools.

Full-stack Web Developer - **Sider** - France Oct 2017 — Aug 2019

- Full-stack web developer in an agile team developing and maintaining an **e-commerce website** using Symfony.
- Implemented significant improvements, including UI/UX enhancements, search/filtering functionalities, API integration, and user behavior tracking.
- Developed and maintained internal web tools, from **needs analysis and technical specifications** to development and deployment on Linux environment.

Software Developer - **Aquitem** - France

Sep 2016 — Aug 2017
